**HM Cragg Partners with Falcon Electric**  
New Product Line Available from HM Cragg

EDEN PRAIRIE, Minn. (Spring 2011) – HM Cragg, a leading distributor of backup power supplies and complementary products, now carries Falcon Electric voltage regulators, frequency converters, and single-phase UPS product scalable up to 40 kVA. The SSG Ultra product line from Falcon is a true on-line double conversion system offering “ultra-wide temperature range protection” that makes it ideal for outdoor (traffic, mass transit, refining) environments. HM Cragg has partnered with Falcon Electric to distribute their high-quality power conversion systems.

Falcon Electric has been manufacturing UPS and power conversion systems for over 23 years. Since holding the original patent for a high-frequency online UPS under 10 kVA, Falcon now builds some of the most reliable military-grade power conversion units available in the industry. Falcon’s UPS equipment boasts a life expectancy of 12 years, making them an exceptional “green” value.

**About HM Cragg**

Since 1968, HM Cragg has provided preventive maintenance and installation services on backup power systems, including power plants, batteries, chargers, rectifiers, cabling, racking, and grounding systems. With a full service staff of Telcordia-trained technicians, HM Cragg is experienced in telecommunications, switchgear and control, and UPS (uninterruptible power systems) environments. More information is available at [www.hmcragg.com](http://www.hmcragg.com).

**About Falcon Electric**

Headquartered in Irwindale, California, Falcon Electric, Inc. is a leading manufacturer of award-winning power protection and conversion solutions. For over 20 years, Falcon has been dedicated to offering the latest in technology, superior engineering standards, and unmatched technical support and customized solutions. Falcon manufactures power systems that meet the exacting standards of the military/aerospace, scientific/labs, industrial automation, computer, telecommunications and other industries that demand the highest product reliability to meet their critical power needs.
