

# ENVIRO-TRAY

## Modular spill containment for flooded battery applications

The Enviro-Tray is designed to offer low cost spill containment to meet government and fire-code standards. The Enviro-Tray can be configured to fit most flooded battery applications with its versatile four-way inter-locking technology. They can easily slide under virtually any battery system and still maintain its efficiency.

### Features and Benefits

- > Acid resistance
- > Modular design
- > Can be configured to fit most applications
- > Complete with absorbent pillows
- > Four-way inter-locking technology
- > Easy to assemble and install
- > Durable polypropylene construction
- > In compliance with UL94 Fire Testing
- > Patent pending on our unique Enviro-Tray system
