Powerware

Single Phase Systems-North American TPC115-10 Series

Enclosure Power Distribution Units (ePDU™)

TPC115-10-D Front

TPC115-10-D Rear

RACK MOUNTED

- 19" x 1.72" (1U) x 8.0"
- Approximate shipping weight: 14 lbs.

(10) NEMA OUTLETS

- 2 unswitched on front and 8 switched on rear panel. Unswitched outlets are tied to the SW-II outlet section

POWER INPUT

- Power cable with plug is attached to unit through the rear panel cable grip

(3) INDICATOR LIGHTS

- Main breaker power "on" and power to the unswitched outlets
- Power "on" to the SW-I outlets
- Power "on" to the SW-II outlets

SPIKE/SURGE SUPPRESSION

- L-N, L-G, N-G

EMI/RFI FILTERING

- Common Mode Line to Ground
- Differential Mode Line to Line

OVERLOAD CIRCUIT PROTECTION

- Electromagnetic breaker provides manual on/off switching and trips in an overload condition

LOCAL/OFF/REMOTE SWITCHING

- Local: Power "on or off" to the switched outlets
- Off: When breaker is "on" but this switch is in the "off" mode, you will have power to the unswitched outlets only
- Remote: Power "on or off" to the switched outlets via a remote device
- Latching remote, on "LT" systems, has the selection switch wired for Remote/Off/Remote - There is no local control

MULTIPLE TIME DELAY™ (MTD™)

- Activated "locally" or "remotely", SW-I outlets power up immediately, followed four seconds later by SW-II outlets which is followed four seconds later by the sequenced remote I/O port.
- Add "/MTD" after part number, i.e. TPC115-10-A/MTD

REMOTE I/O PORTS

- 3 front/2 rear
- Remote on/off and EPO control, EPO overrides remote and local control
- Sequence Power Up additional equipment down line (3rd connector on front panel)
- Latching remote feature - (N/C) EPO, momentary start
 - Add "-LT" to the part number when the MTD feature is not being used
 - Add "/LT" to the part number when the MTD feature is used

Optional Remote Control Panel

RCP100-BLK-LT

RCP200-BLK-LT

Standard Remote Control Interface

REMOTE START REQUIRES (2) CONDITIONS:

1. The "on/off/remote" switch must be in the "remote" position.
2. A maintained closure between pins 1 & 3 will turn the unit on.

REMOTE POWER OFF REQUIRES (1) CONDITION:

1. Opening the maintained connection between pins 1 & 3 will turn off the switched outlets.

REMOTE EPO REQUIRES (1) CONDITION:

1. A maintained contact between pins 2 & 3 will turn off the switched outlets regardless of the position of the "on/off/remote" switch.

SEQUENCED REMOTE:

Connect pins 1, 2 & 3 of the sequence port to pins 1, 2 & 3 on any remote port of the slave unit. **(Do not connect to another "sequence" port!)** The sequence port of the master unit activates 4 seconds after the final set of outlets turn on. Additional units may be daisy chained in this fashion.

CAUTION!
THIS TYPE OF REMOTE IS NOT TO BE SUBSTITUTED FOR A SAFETY INTERLOCK!

EPO is normally open, so removing the EPO connection will not shut down the power to the unit.

Latching Remote "LT" Control Interface

REMOTE START REQUIRES (2) CONDITIONS:

1. A maintained contact between pins 2 & 3.
2. A momentary contact between pins 1 & 3.

REMOTE POWER OFF OR EPO REQUIRES (1) CONDITION:

1. Opening the maintained connection between pins 2 & 3. Additional EPO or stop buttons can be connected in series between pins 2 & 3. This will turn off the switched outlets regardless of the remote switch position.

SEQUENCE REMOTE:

Connect pins 1 & 2 of the "sequence" port to any remote port on another "-LT" unit. The sequence port activates 4 seconds after the final set of outlets turn on.

(Do not connect to another "sequence" port!)

NOTE: "LT" units are designed for remote operation only. Even when the "REMOTE/OFF/LOCAL" switch is set to "LOCAL", the unit still requires a power request from the remote ports to turn the unit on.

REMOTE OPERATION: Most Pulizzi® units have more than one remote connector. Unless labeled as "SEQUENCE" they are wired in parallel. Connection to only one remote connector is required. It is recommended that a Pulizzi® control panel be ordered for use with your PDU. Connectors are provided for those who wish to wire their own switches or control panels. We recommend using 14 AWG wire and not exceeding 50 feet for any remote cable. Mating control panels can be seen on our web site at www.pulizzi.com.

If additional remote connectors are needed: The female AMP connectors used in our Power Controllers are: three pin - Part Number 1-480304-0 and four pin Part Number 1-480425-0, and are used with AMP Socket Terminals, Part Number 60619-1. The mating male AMP connector is: three pin - Part Number 1-480305-0, and four pin - Part Number 1-480426-0 and are used with AMP male contacts Part Number 60620-1.

Optional Cable Restraint and Management

KIT-CABRES-02

TRANSVERSE MOUNTING

- Prevent downtime and accidental disconnection
- Secure cables/plugs to Power Distribution Unit
- Cable ties provide highest level of retention
- “Fixed Bracket” versions allow attachment to rear only
