

UL-Recognized Component

THE *m-s* **endur® II** SERIES VRLA BATTERY *THE TRUE LONG LIFE BATTERY™*

For UPS Standby Power Applications

CAPACITIES FROM 0.669 TO
3.121 KILOWATTS PER CELL

The msEndur II is the latest advancement in battery technology with enhanced features for UPS applications.

By combining the service life reliability of a flooded battery with the performance energy density of a valve-regulated battery, C&D has created the msEndur II — The True Long-Life Battery™.

The msEndur II series of batteries are unmatched in power density with space saving modular designs and have a 20-year design life to reduce the total cost of ownership.

With its much lower float current, the msEndur II yields significant electrical costs savings over its life making it more environmentally friendly than other 2V VRLA batteries.

APPLICATIONS

- Data Centers
- Network Operations Centers
- Internet Hosting Sites
- Banks & Financial Markets
- Manufacturing Facilities
- Emergency 911 Response Centers
- Computer Rooms
- Industrial Process Controls

FEATURES & BENEFITS

ADVANCED SYSTEM FEATURES

- Modular design for ease of installation and stacking flexibility
- Space saving design for the greatest amount of power in a small footprint
- Exceeds 1997 UBC Zone 4 seismic requirements for at or below grade installations
- Certified as NEBS Level 3 and compliant to Earthquake Risk Zone 4 in various system configurations
- Exceeds 2006 IBC requirements up to 300% g level and 2007 CBC compliant
- Tin-plated copper alloy connectors minimize maintenance
- New C&D Ohmic Ring® for ease of maintenance readings. With specially adapted probes only one technician is required to take readings.

ADVANCED MATERIALS

- Advanced micro-porous Absorbed Glass Mat separators for ultra-low float current — reduces grid corrosion for a long, usable service life
- Proprietary calcium alloys to minimize positive grid corrosion and growth — maximizes battery life
- Robust polypropylene container and cover — enhances product quality and improves strength of materials for safe operation with flammability rating UL94 V0, LOI>28%

- Highly efficient, proprietary plate processing for high utilization of active material — results in high energy density and low float current

ADVANCED PROCESSES

- Advanced formation process results in a narrow float voltage window making on-site float matching unnecessary
- Highly controlled manufacturing processes for exceptional and consistent plate quality

ADVANCED SERVICE LIFE & WARRANTY

- Proprietary cell design and manufacturing process provides for 20 year design life and documented long-lasting service life
- Best 2V VRLA Warranty in the Market: 5 years full warranty for UPS float service applications

ADVANCED EXPERIENCE

- Over 100 years of experience in the battery industry
- The only producer and marketer of complete battery and electronics systems for total power solutions
- Fully backed by a worldwide network for local service

SPECIFICATIONS AND CHARACTERISTICS

Cells, Voltage per Unit	1 cell, 2 VDC
Recommended Operating Temperature	+77°F (+25°C)
Recommended Float Charging Voltage	2.25 - 2.27 VPC at +77°F (+25°C)
Charger Compensation Temperature/Voltage	-2mV/cell/°F above 77°F (-3.6mV/cell/°C above 25°C)
	+2mV/cell/°F below 77°F (+3.6mV/cell/°C below 25°C)
Terminal	Tin Plated Copper Inserted Terminal to accept 5/16-18 UNC Bolt
Connection Torque	Initial: 160 in-lbs (18 N-m)
	Re-torque: 125 in-lbs (14 N-m)

	AT-07P through AT-17P	AT-19P through AT-39P
Number of Terminals	2	4

Modules

msEndur II cells are designed to be mounted in stackable modules of either 3, 4, or 6 cells. The most popular module sizes and configurations for UPS systems are:

	AT-07P through AT-21P	AT-23P through AT-39P
Cells Wide/Module	6	3
Modules High	8	8

The specific cells wide x modules high system configuration is flexible and can be configured to best match the physical requirements of the customer's site.

Detailed system dimensions and combinations are available in the **msEndur II Module Brochure 12-1014**.

Service Life - Reliability

The msEndur II is the latest advancement in battery technology. By combining the service life reliability of a flooded battery with the performance energy density of a valve-regulated battery C&D has created the **msEndur II — The True Long-Life Battery™**. The msEndur II series of batteries are unmatched in power density with space saving modular designs and have a 20-year design life to reduce the total cost of ownership.

**Has the light
turned on yet?
Both devices
can save you 75%**

Standard 2V VRLA

msEndur II

The msEndur II sealed battery is the environmentally friendly battery that saves you money in normal operation.

The same low float current that ensures a twenty year life, is good for the environment and saves money

- Up to 75% lower float current
- Consumes up to 75% less electricity
- Lower float current generates less heat
- Less heat generated reduces required air conditioning
- Less electricity consumed in float charging and air conditioning = reduce carbon emissions
