Marathon Power Specialty UPS Solutions

HM Cragg offers products from Marathon Power such as supercapacitors, customized UPS configurations, and ruggedized UPSs for use in harsh environments like traffic applications. All of Marathon Power products are made to ISO 9001 certified standards.

Traffic Control Line Interactive and Double Conversion UPS

Traffic control and signal equipment consistently experience power interruptions. The Marathon Power Traffic UPS series are maximum performance systems suitable for a wide range of transportation applications and extreme temperature environments. Designed for extended run-times, these units also feature temperature-compensated charging to maximize battery life in harsh environments.

Supercapacitors

Marathon Power offers a state-of-the-art double-conversion UPS that uses Supercapacitor technology for energy storage instead of conventional batteries. The system is designed to provide short-term backup to sensitive loads in applications that either need to ride through voltage sags and momentary power outages, or simply bridge the start-up of a generator.

Marathon Power products are ideal for these markets:

- Healthcare
- Automation
- Test & Measurement
- OEM
- Security
- Telecom
- Traffic
- Information Technology
- Green Energy

UPS Customization

Marathon Power can customize most standard models to meet the specific requirements of many applications. If you have an application that requires a special product or customized solution, please contact HM Cragg so that we can discuss your needs.

Some examples of customization include:

- Higher temperature and/or longer life batteries
- Remote location of front control panel
- Internal and external cable connections
- Custom outlet configuration of back panel
- Input and output power cord preparation
- UL and CSA approval for 230V models
- Other mechanical variations
