RLE Leak Detection, Facility Monitoring and Network Integration Solutions

RLE Technologies understands how devastating and costly a leak or temperature spike in a sensitive area can be. For 30 years, RLE has been dedicated to developing newer, better and faster ways to ensure YOUR facility is protected from environmental disasters.

Falcon Facilities Monitoring

Falcon Facilities Monitoring Solutions include a wide variety of sensors and the central hub that provides an easy-to-understand, comprehensive view of facility conditions and the status of equipment in critical areas.

Wireless Solutions
RLE's wireless solutions are quick and affordable to install – electricians and conduit are no longer necessary to establish reliable environmental monitoring solutions. The Wi-Manager gateway receives signals from wireless devices, provides direct notification of alarm conditions, and relays the wireless signals to Facilities Monitoring Systems.

Facilities Monitoring Systems
Falcon Facilities Monitoring Systems provide facility managers with complete, 24/7, peace of mind against environmental threats. Their web-based alarm monitoring, notification, and control systems can be accessed and configured with a web browser and do not require additional computer hardware or software. Falcon monitoring solutions are easy to configure as a stand-alone system or as part of an integrated building management or network management system.

Seahawk Leak Detection

RLE's SeaHawk leak detection solutions are engineered to provide unparalleled protection against any form of conductive fluid that might threaten your facility. The line includes fluid sensing cable and spot detectors as well as the monitoring devices and accessories to support them.

RLE offers two types of controllers to fit a user's specific needs: **zone controllers**, which will simply notify you if there is a leak anywhere along the length of a sensing cable, and **distance-read controllers**, which will use the cable to pinpoint the leak within inches to assure fast response time in larger areas.

Raptor Integration

Raptor Integration Solutions simplify signal convergence and alarm annunciation. They easily integrate into existing management and monitoring systems to provide enhanced visibility of critical equipment and environmental conditions.

Raptor products include:
- Protocol Converters
- Relay Replicators
- Alarm Status Panels
- Power Fail Monitors
- Ground Fault Monitors
