

Protect your home IT equipment with

Working from home has become more common in today's world. It's just as important to protect your technical equipment at home as it is in the office – perhaps even more important because “IT” isn't just down the hall. Power issues cause damage to sensitive equipment and can corrupt data.

Take the necessary steps to ensure your home equipment is protected from common electrical issues by selecting one of these power protection options from Eaton:

	Good	Better	Best
	5S550	5SC750	5PX1000RT
Form Factor	Tower	Tower	Tower or Rack Mount
