

Eaton FERRUPS UPS end-of-life announcement

Effective May 7, 2021

Eaton is announcing end-of-life (EOL) status for all Eaton 60Hz FERRUPS UPS. The current FERRUPS product line will be refreshed by the Eaton FX UPS series.

Beginning July 7, 2021, all 60Hz FERRUPS models will no longer be available for purchase. Due to the limited supply of components for these products, last time bulk purchases will not be offered during this period. Additionally, it is possible that select models will be unavailable due to obsolescence issues before the intended EOL date of July 7, 2021. Orders for EOL transitioning FERRUPS products will be fulfilled on a first come, first serve basis. Furthermore, due to the unique nature and age of these FERRUPS models, it is possible that a minority of current orders will be unable to be filled. Projects where these models are currently being quoted, beyond the EOL date, should be re-specified to a non-end of life product. If this is not possible please reach out to Eaton for immediate assistance, as some exceptions can be made.

Eaton will be replacing the majority of the EOL models with the new Ferrups FX product line. The first model in this new product line, the FX3100, is available for quoting and shipping purposes. The remaining Ferrups FX models will become available throughout 2021. Eaton acknowledges this gap in availability, and we are dedicated to assisting in whatever way possible during this transition.

We appreciate your support as we transition all our customers.

EOL Eaton FERRUPS part numbers

Model numbers	CTO numbers	Description
FE1.15 kVA model FERRUPS	All CTOs starting with FD	1.15 kVA 60Hz FERRUPS
FE4.3 kVA model FERRUPS	All CTOs starting with FI	4.3 kVA 60Hz FERRUPS
