

Efficient. Versatile. Reliable. Portable.

EdgeCool, available through HM Cragg, revolutionizes IT cooling by transforming a server rack into a portable, energy-saving server room. It brings data-center efficiencies down to the rack level—and is the only split system designed for self-contained operation with nearly any rack. With EdgeCool, you will have:

Targeted Cooling—Gives You Ultra Efficiency.

Cool the rack, not the room. Hot and cold aisles keep air from mixing to ensure you get optimal cooling performance and energy savings.

Ability to Add to Your Existing Rack—Move It Anywhere.

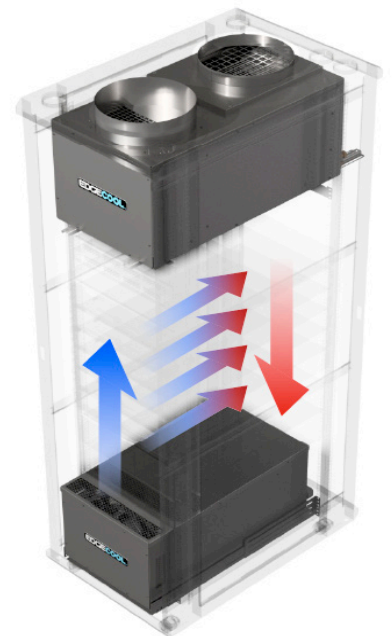

Simple installation turns practically any rack, open or sealed, into a portable, self-contained server room. Works with standard 120V/20A power—no external components or building modification required.

Continuous Operation—For Reliability Year Round.

Designed with DENSO dependability for primary, supplemental, or backup cooling. Rest assured of guaranteed reliability in any season.
