

Battery Energy Storage Systems (BESS)

HM Cragg is proud to provide advanced, safety-certified Battery Energy Storage Systems (BESS) for all of your energy storage needs. On-grid or off-grid, our energy storage systems can be used for a wide variety of applications, both single-phase and three-phase. Energy storage applications come in many sizes, and with our scalable solutions you can meet those needs, large or small. HM Cragg believes in safety and resilient technology for energy storage, and therefore leverages Lithium Ferro Phosphate (LFP) chemistry for true peace of mind. From providing primary power to a business, or simply storing power for times of outage, configure your system for energy independence and reliable long-term performance for real energy savings.

ENDLESS APPLICATIONS

Peak shaving and demand response for energy savings, back-up for critical loads, EV charging support, storage for solar production, traditional UPS replacement and generator support are just some of the options for BESS.

SIZED TO FIT YOUR NEEDS, LARGE OR SMALL

Scalable solutions from HM Cragg allow you to right-size a system to meet your needs, rather than over-spending on a single unit.

CONTROL ANYTIME, ANYWHERE

Remote monitoring onboard our BESS products gives you peace of mind that your system is working correctly.

ADAPTABLE INSTALLATION OPTIONS

NEMA 3R/4/4X enclosures support all weather conditions for both indoor and outdoor installations.

REDUCED MAINTENANCE

LFP energy storage systems require minimal maintenance as opposed to lead-based batteries.

UL-LISTED SAFETY

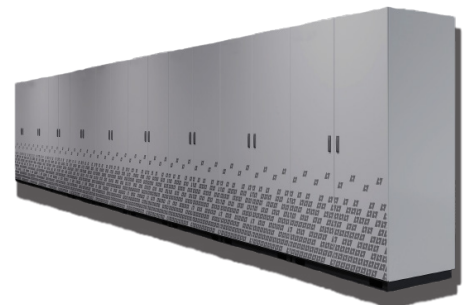

UL 9540 listed UL 9540A tested products to ensure reliable performance over many years of system use.

ROBUST CAPABILITIES

LFP energy storage systems have thousands more lifecycles over traditional lead batteries and can be cycled to a much deeper depth of discharge.

ONE-CALL SUPPORT

Vertical integration simplifies installation, compatibility and technical support. Contact HM Cragg today to discuss your application with our industry experts.
